

Name: _____

6th Grade Volcano Project

Due: Tuesday~ August 27th

Project Description: You will research a volcano that currently exists in our universe. Using this information you will build a volcano and write a brief summary of your findings.

Volcano Model:

1. Construct a model of your researched volcano.

Volcano must erupt when presented to the class. There are several websites online that will help you create the perfect mixture.

2. Feel free to incorporate features such as cities, oceans, forests, lakes etc... (optional)

3. Be creative and have FUN! This can be done with your family. Some ideas of materials are: clay, Styrofoam, paint, plaster, paper, or anything edible in the kitchen. (Rice crispies, cake, icing etc.) You choose!

4. Label your volcano. (Name only)

Volcano Summary:

- Type a brief summary describing your volcano. Summary must include: volcano name, country/location, type of volcano
- Describe the benefits the volcano serves to the surrounding town/area.
- Describe the history of the volcano's eruptions (how often)
- Describe the most famous eruption from this volcano and its effects.
- Describe what measures the local population if any can take if there is a major eruption in the future.
